

South Dakota FAASTeam presents:

FAASTeam Summer Safety Seminar

Are you ready to move up to a high performance aircraft? Most high performance aircraft are also considered a complex aircraft and require an understanding of systems. The increasing complexity of modern airplanes emphasizes the importance of a thorough checkout for pilots who change from one make or model airplane to another. The similarity of the operating controls in most airplanes leads many people to believe that pilot competency can be carried from one type of airplane to another, not true. This seminar will provide a brief overview of some important things to consider when making transitions.

The General Aviation Joint Steering Committee (GAJSC) determined that a significant number of accidents and incidents could have been avoided if the pilot was more knowledgeable with the aircraft systems. Come join us as we review several errors associated with a lack of transitional training which lead to loss of control situations.

Directions: This seminar will take place at the Ramkota Hotel in one of the conference rooms.

Event Details

Thu, Jul 14, 2016 - 19:00 CST

Best Western Ramkota

Conference Room

1400 8th Avenue NW

Aberdeen, SD 57401
